### Kansas Beats Tendler.

Kansas Beats Tendler.

The Buffalo Italian, who goes bader the name of Kansas, went 15 rounds with Tendler when the latter was as good as he is now and wen the decision. That was a decided setback in the career of the Philadelphian. Leonard met Kansas shortly after that and whipped him seasily, although he did not knock him out. July 4, last, Tendler knocked Kansas out in a hout in Michigan City, so completely outclassing Kansas that the bout was very one sided. Kansas is as good now as when he beat Tendler.

Ritchie Mitchell went 10 rounds with Tendler and gave a splendid account of himself, while Leonard knocked the Milwaukee lightweight out.

here was some talk a few months that Leonard could not make lightweight limit—135 pounds and he strong. He was overweight for several of his matches. But sys-tematic training put him in perfect condition and when he fought Kan-sag July 4 he was down to the resas July 4 he was down to the required poundage and as strong as he ever was, as evidenced by the fact that he knocked out as tough a lightweight as there is in poxing. Leonard will make the weight for Tendier and be at his best. If he fails to win he cannot blame his condition. In the fight with the Buffalo Italian, he appeared to have all his old cunning, his punch, his fill and ability to take punishment. Tendier is without doubt the best of the challengers. The Philadelphian hits hard and is clever and fast enough to give Leonard the battle of his career. His style may worry Leonard for a few rounds, but the champion should be able to solve it by the third or fourth.

There is some talk that the Jersey City fight, being a no-decision affair, is merely preliminary to a fight for the title in New York, where decisions are given. But if the fighters really are at daggers points, as their pleas agents claim, this may not be the case.

Leonard won the title in 1917 when he knocked out Freedy Walsh in

### Anthropologists Are Investigating Theory Of Man's Evolution

LONDON.-This should interest William Jennings Bryan.
British anthropologists are investigating the theory that modern men are not men descended from apea, but have walked this old mundane sphere in their present hysical form for some 100,000

years.

The anthropologists are of the opinion that this research will lead to the conclusion that if a neolithic man were to don the "topper," "spats" and other garments of the present-day Piccadilly "swanker" that he would cause no sensation because those two men are physically the same.

H. J. Fleure and T. C. James, of the University College of Wales and two of the British scientists who are working on the theories expounded by Mr. Bryan in contravention to Mr. Darwin, that after all modern man is only the neolithic man grown old.

Natives and British Still Remembered

There was one fellow who might have been good enough to go after the championship in another year or two—Rahh Smith—a hard hitting amateur, as tail as Willard and tof a leaner and faster build. But Smith is just out of the hospital after being hid up four mouths as the result of a crash between a fire truck and as electric train. It is unlikely he will ever fight again. No other newcomer in the heavy-weight ranks looks anything like a champion.
